

Name candidate: _____

Examination questions: Safety for Intermediaries and Supervisors

Event code: Test exam Safety for Intermediaries and Supervisors

Please read the following instructions carefully!

This examination is comprised of **70** multiple-choice questions.

Each question is followed by three possible answers, of which only one is correct.

A maximum of **70** marks can be scored in this examination. Every correct answer scores 1 mark.

You will have passed when you score at least **49** marks.

The maximum time for this examination is **105** minutes.

Requirements:

- these examination questions
- the answer sheet (used to note your answers)
- a pencil and eraser

Directions:

- make sure that you have all the pages in these examination questions
- only use a pencil to enter your answers on the answer sheet
- indicate your answer by using your pencil to blacken the appropriate square
- always thoroughly erase any incorrectly entered answer

A multiple-choice question will be regarded as incorrectly answered when:

- the wrong answer has been chosen
- more than one square has been blackened
- no square has been blackened
- a square has not been blackened, but has been marked in some other way

At the end of the examination:

- write or check your name on the answer sheet
- give the supervisor these examination questions and the answer sheet

1 What is the meaning of the CE marking on a machine?

- A The product does not require any regular maintenance in Europe.
- B The product may only be used in European countries.
- C The product meets the minimum European safety requirements.

2 Which body has the authority to order work to be halted?

- A The government's Health and Safety Inspection Service.
- B The trade union.
- C The Arbodienst (Occupational Health and Safety Service)

3 What can endanger the well-being at work of an employee?

- A Personal circumstances.
- B Going home too early.
- C The lack of a CLA.

4 An employer is responsible for which of the following persons?

- A Only for the employer's own personnel.
- B For everyone at the construction site and for the local residents.
- C Only for the employer's own and hired-in personnel.

5 A temporary worker is put to work by a temporary employment agency in a hiring company. Who is responsible for the application of the Health and Safety (H&S) legislation?

- A This is defined in the temporary employment contract.
- B The hiring company.
- C The temporary employment agency.

6 For which actions is the risk of accident the highest?

- A Fashioning steel with an angle grinder.
- B Fashioning steel with a file.
- C Fashioning steel with a hammer.

7 What is a Task Risk Analysis (TRA)?

- A An overview of the tasks within a company that entail potential risks.
- B An evaluation of the tasks identified in the Risk Assessment and Evaluation (RA&E).
- C An analysis of the risks associated with the execution of high-risk activities.

8 You come across an unsafe situation at your work. What is the first thing you must do?

- A Try to remove its cause.
- B Inform the government's Health and Safety Inspection Service.
- C Remain near the unsafe situation.

9 What is risk evaluation?

- A Consultation and the recording of potential hazards on the work floor.
- B The determination of the severity of the risks.
- C An evaluation conducted at the end of the work together with supervisors.

10 How do you communicate with employees about the risks and control measures on the work floor?

- A Through discussion between the immediate supervisor and his/her operational employees.
- B Through discussion among all operational employees in a department.
- C Through discussion among all of the immediate supervisors in all departments.

11 An accident without serious injury has occurred. What should be done in this case?

- A The accident must be reported to the Emergency Services by dialling 112.
- B Steps must be taken to prevent the accident's recurrence.
- C This must be reported to the government's Health and Safety Inspection Service within 24 hours.

12 What is an example of a person-related factor that could lead to an accident?

- A Insufficient knowledge
- B Insufficient time.
- C Insufficient supervision.

13 What technical measure prevents accidents involving grinders within a company?

- A The selection of a sound ergonomic design.
- B Establishing clear procedures.
- C Appointing an experienced technical director.

14 What are parts of an accident investigation?

- A The gathering and analysis of evidence and a final report.
- B Fast accident reporting and appropriate emergency assistance.
- C A possible warning or fine issued by the government's Health and Safety Inspection Service.

15 What constitutes a good plan of approach?

- A A presentation about the Risk Assessment and Evaluation (RA&E) and the identified measures.
- B A verbal explanation of the Risk Assessment and Evaluation (RA&E) and the identified measures.
- C A written report on the measures as a result of the Risk Assessment and Evaluation (RA&E).

16 Why is order and tidiness important to working safely?

- A Working in a dusty environment is unhealthy.
- B Because this is important for the company's image.
- C The number of accidents goes down when there is order and tidiness.

17 What is a frequent cause of stumbling, slipping or tripping?

- A Failure to wear safety footwear.
- B The lack of barrier tape along a footpath.
- C The presence of cables and pipes lying across a footpath.

18 What increases the probability of unsafe behaviour on the part of an employee?

- A Arrangements concerning the execution of the work have been made.
- B The work order is incomplete.
- C There is discord between the employer and the works council.

19 What is one task of the intermediary in posting a temporary worker to carry out a high-risk task?

- A Make arrangements with the hiring company concerning the specific instructions to be provided to the temporary worker.
- B Provide the temporary worker with the training required to use the machines at the workplace.
- C Regularly visit the workplace to check whether the temporary worker is following the instructions.

20 What is meant by promoting a safety mentality?

- A The publication of the policy statement in the canteen.
- B Providing written procedures.
- C The motivation to comply and collaborate with respect to safety.

21 What action is an employee required to take if a protective device adversely impacts the pace of work?

- A Temporarily deactivate the protective device him/herself.
- B Ask technical services to remove the protective device.
- C Do not remove the protective device and use it in the correct way

22 Which work accidents must be reported to the government's Health and Safety Inspection Service?

- A Only accidents involving a fatality.
- B All serious accidents.
- C All accidents.

23 What is a safety passport?

- A A personal document that the employee is required to show when travelling abroad and that identifies the companies for which he/she has worked.
- B A personal document that keeps track of the companies where the employee has worked.
- C A personal document stating important details regarding education, training courses, medical fitness and vaccinations.

24 What is the task of the employment agency with respect to health and safety at work?

- A Organise safety training.
- B Provide the necessary PBM's (personal protective equipment).
- C Provide the temporary employee with general information about content, risks and prevention measures.

25 What must the hiring company define when requesting a temporary employee?

- A The conditions for working overtime in safe circumstances.
- B What PBM's (personal protective equipment) must be worn.
- C Quality requirements that the PBM's (personal protective equipment) must meet.

26 What is the purpose of general safety rules?

- A They govern the use of safety harnesses for working at height.
- B They identify the correct barriers to be installed for work activities.
- C They govern reporting in and out at the work site.

27 In which situation should you use a blanking flange?

- A To shut off the supply pipe when working in a confined space.
- B To prevent internal contamination when transporting new pipes.
- C When checking the contents of a tank via a sampling point.

28 Why would it be necessary to obtain a supplementary werkvergunning (work permit)?

- A For working with tools and machines.
- B For working with extension ladders.
- C For working with cranes and hydraulic platforms near important installations.

29 What does a prohibitory sign at the construction site look like?

- A Circular white sign with a blue symbol.
- B Diamond-shaped orange sign that contains a white symbol.
- C Circular white sign with a red surround and a red diagonal line.

30 What rules apply to the employer in terms of paying attention to the hazards at the work site?

- A It is a mandatory component of the briefing programme.
- B It is a voluntary component of the briefing programme.
- C It is only mandatory if so indicated by the Arbodienst (Occupational Health and Safety Service).

31 The supervisor has an important task concerning werkvergunningen (work permits). What is the minimum he/she must do?

- A Ensure that the werkvergunning (work permit) can be used again the next time.
- B Ensure that the werkvergunning (work permit) is handed in immediately when the work ends.
- C Ensure the werkvergunning (work permit) is available at the place of work.

32 What are the phases in controlling and tackling emergency situations?

- A The initial alarm, the actions and measures and finally the termination.
- B The initial alarm, the installation of crowd control barriers and alerting the emergency services.
- C The initial alarm, the implementation of measures, and termination by a sound signal.

33 What is a task of the bedrijfshulpverlening (company emergency response team)?

- A To provide safety training.
- B To supply PBM's (personal protective equipment).
- C To provide first aid.

34 What type of breathing protection do you use in a space with little oxygen?

- A Self-contained breathing apparatus.
- B A disposable mask, provided it is a good fit for your face.
- C A filter mask with the correct filter cartridge.

35 A hazardous situation arises. When should people and the source be separated from each other?

- A When PBM's (personal protective equipment) are not available.
- B When it is impossible to tackle the source.
- C Once you have successfully dealt with the source.

- 36 One of the following pictograms is displayed on the packaging of a substance. What is one characteristic of this substance?

(black symbol on orange background)

(black symbol on white background with red surround)

- A Highly flammable.
- B Oxidising.
- C Corrosive.

- 37 What could be the cause of hazardous substances leaking out of a storage tank?

- A The liquid level being too low.
- B Inadequate ventilation.
- C Poor mounting of flanges.

- 38 What can affect the consequences of poisoning?

- A The victim's training and education.
- B The victim's experience.
- C The victim's age.

- 39 What is the meaning of the blue area of the hazard diamond?

- A It indicates that there is a fire hazard.
- B It indicates that there is a health risk.
- C It identifies the stability of the substance.

- 40 Where could asbestos be present?

- A In packaging materials.
- B In old furniture.
- C In the heat insulation of installations.

41 What is the name of the concept in which substances start burning without the aid of an ignition source?

- A Ignition temperature.
- B Spontaneous ignition temperature.
- C Flashpoint.

42 What is the first thing you should do if you discover a fire?

- A Ensure your own safety.
- B Alert the fire department.
- C Alert the police.

43 What is an explosion-hazardous environment?

- A An environment where explosions are a frequent occurrence.
- B An environment with too much gas and too little air.
- C An environment in which an explosive mixture can arise.

44 How does a catalyst affect a fire?

- A It affects the smoke production of a fire.
- B It affects the flashpoint of a liquid.
- C It affects the speed of the combustion process.

45 Why is sand a good extinguishing agent for flammable liquids spread over the ground?

- A Sand inhibits the supply of oxygen.
- B Sand retards combustion.
- C Sand cools the liquids.

46 What is an important issue when assigning a job to a temporary worker?

- A Approval from the temporary employee if the selection deviates from the conditions in the request.
- B Information from the hiring company if the selection deviates from the conditions in the request.
- C Approval from the hiring company if the selection deviates from the conditions in the request.

47 You are working with a large compressed air-driven jackhammer. With what requirement must this pneumatic hand tool comply?

- A This pneumatic hammer must be suitable for different types of work.
- B This pneumatic hammer must feature a dead man's switch.
- C This pneumatic hammer may only be used by workers who are legally certified to do so.

48 A safe hand grinder must be equipped with which of the following?

- A A lockable switch.
- B A side handle.
- C Zero-voltage protective device.

49 Which of the following is a hazard in working with hoisting equipment?

- A The employee may become physically overburdened.
- B The load may fall from the hook.
- C The worker may incur hearing loss.

50 Which of the devices listed below is an unpowered hoisting device?

- A A manual hoist.
- B A crab.
- C A hoisting container.

51 Are you permitted to use a forklift truck as a hoisting device?

- A Only if the forklift truck is equipped with special hoisting equipment.
- B This is never permitted with any forklift truck.
- C This is only permitted when lifting slings around the tines are used for hoisting.

52 Which toolbox meetings should a temporary employee attend?

- A He/she is not obliged to attend toolbox meetings.
- B The toolbox meeting organised by the hiring company and where the temporary employee is involved as an operational employee.
- C The toolbox meetings that are organised by the employment agency.

53 Why is the use of propane in pits and cellars dangerous?

- A The use of propane consumes very high amounts of oxygen.
- B Propane is heavier than air, as a result of which it collects at the lowest point.
- C The use of propane is associated with very high temperatures and fire can erupt in pits and cellars.

54 How can you prevent falling hazards at the edge of a work floor?

- A By placing warning signs at the edge of the work floor.
- B By giving the workers proper instruction at the start of the work.
- C By putting proper barriers at the edge of the work floor.

55 You come across a spread out tarpaulin on a work floor. What is the one thing you must be sure to take into consideration?

- A That the wind has caused the tarpaulin to become loose.
- B That there might be an opening below the tarpaulin.
- C You may only put junk on this tarpaulin.

56 Working with gas cylinders/bottles in an excavation can create added danger. What safety measure do you need to take?

- A Only position the gas cylinders/bottles against the wall of the excavation.
- B Never work with gas in or near an excavation.
- C Do not place any gas cylinders/bottles in the excavation.

57 What safety directives apply to working in a safety cage attached to a crane?

- A The crane driver and the people in the safety cage must be able to see each other at all times.
- B Entering or exiting the safety cage is permitted as soon as it is less than one metre off the ground.
- C Wearing personal fall protection (safety harness) is mandatory.

58 What increases the risk of fire or explosion in a confined space?

- A There is little ventilation, as a result of which the grenswaarde (threshold limit value) (MAC value) can be reached quickly.
- B There is little ventilation, as a result of which the air pressure can increase quickly.
- C There is little ventilation, as a result of which the LEL (Lower Explosion Limit) (onderste explosiegrens) can be reached quickly.

59 What aspects must definitely be considered in conducting an evaluation of the temporary worker with the hiring company?

- A Respecting breaks.
- B The following of safety instructions by the temporary employee.
- C The wear and tear on the PBM's (personal protective equipment) when carrying out the work.

60 How can you reduce the risk of electrocution?

- A By working with wet hands.
- B You cannot reduce the risk of electrocution.
- C By standing on a rubber mat.

61 What increases the risk of accidents involving electricity at your workplace?

- A The use of uninsulated tools.
- B The use of spark-free tools.
- C The use of chargeable tools.

62 What is a hazard in the use of extension cables and multiple sockets?

- A Overloading of the cable, which can lead to fire.
- B Leakage currents with the attendant danger of electrocution.
- C Short-circuit when too many power cables and electrical plugs are used.

63 Under what conditions are you permitted to work independently on an electrical installation?

- A After you have received verbal instructions.
- B When you have the VCA (SCC) Basic Safety diploma.
- C If you have a diploma for this.

64 What are the hazards of exposure to noise?

- A Heart rhythm disorders.
- B Muscle ache.
- C Reduced concentration.

65 Two noise sources of 80 dB(A) each are placed together. How high is the total noise (pressure) level?

- A 160 dB(A).
- B 83 dB(A).
- C 120 dB(A).

66 Who is responsible for making suitable resources available for use during lifting?

- A The employer.
- B The safety officer.
- C The Occupational Health and Safety doctor.

67 What is the requirement that PBM's (personal protective equipment) are expected to meet?

- A They must have a KEMA quality mark.
- B They must have a CE mark
- C They must be approved by the Arbodienst (Occupational Health and Safety Service).

68 What is the maximum attenuation value of hearing protection plugs?

- A 10 dB(A).
- B 45 dB(A).
- C 30 dB(A).

69 How are the different protection classes of dust filters designated?

- A S1, S2 and S3.
- B Blue, brown and black.
- C P1, P2 and P3.

70 What requirement is a safety harness expected to meet?

- A A safety harness must fit well and be adjusted to the wearer.
- B A safety harness must be equipped with leather seat straps.
- C A safety harness must have double stitched shoulder belts.
