

Name candidate: _____

Examination questions: Safety for Intermediaries and Supervisors

Event code: Test exam Safety for Intermediaries and Supervisors

Please read the following instructions carefully!

This examination is comprised of **70** multiple-choice questions.

Each question is followed by three possible answers, of which only one is correct.

A maximum of **70** marks can be scored in this examination. Every correct answer scores 1 mark.

You will have passed when you score at least **49** marks.

The maximum time for this examination is **105** minutes.

Requirements:

- these examination questions
- the answer sheet (used to note your answers)
- a pencil and eraser

Directions:

- make sure that you have all the pages in these examination questions
- only use a pencil to enter your answers on the answer sheet
- indicate your answer by using your pencil to blacken the appropriate square
- always thoroughly erase any incorrectly entered answer

A multiple-choice question will be regarded as incorrectly answered when:

- the wrong answer has been chosen
- more than one square has been blackened
- no square has been blackened
- a square has not been blackened, but has been marked in some other way

At the end of the examination:

- write or check your name on the answer sheet
- give the supervisor these examination questions and the answer sheet

1 What is the meaning of the CE marking on a machine?

- A The product meets the minimum European safety requirements.
- B The product may only be used in European countries.
- C The product does not require any regular maintenance in Europe.

2 Which body has the authority to order work to be halted?

- A The government's Health and Safety Inspection Service.
- B The arbodienst (Occupational Health and Safety Service)
- C The union.

3 What can endanger the well-being at work of an employee?

- A The lack of a CLA (collective labour agreement).
- B Personal circumstances.
- C Going home too early.

4 Must an employer take measures to reduce risks to people living nearby?

- A Yes, the employer is also responsible for the safety of people living nearby.
- B Yes, but only if the building site is not fenced off.
- C No, the employer is not responsible for this.

5 A temporary agency worker is put to work by a temporary employment agency at a hiring company. Who is responsible for the application of the Health and Safety (H&S) legislation?

- A The hiring company.
- B The temporary employment agency.
- C This is defined in the temporary employment contract.

6 For which actions is the risk of accident the highest?

- A Fashioning steel with an angle grinder.
- B Fashioning steel with a hammer.
- C Fashioning steel with a file.

7 What is a Task Risk Analysis (TRA)?

- A An analysis of the risks associated with carrying out work.
- B An evaluation of the tasks identified in the Risk Assessment and Evaluation (RA&E).
- C An overview of the tasks that may cause risks within a company.

8 You come across an unsafe situation at your work. What is the first thing you must do?

- A Inform the government's Health and Safety Inspection Service.
- B Remain near the unsafe situation.
- C Try to remove its cause.

9 What is a risk evaluation?

- A The determination of the severity of the risks.
- B An evaluation conducted at the end of the work together with supervisors.
- C Consultation and the recording of potential hazards on the work floor.

10 How do you communicate with employees about the risks and control measures on the work floor?

- A Through discussion among all of the immediate supervisors in all departments.
- B Through discussion among all operational employees in a department.
- C Through discussion among the immediate supervisor and his/her operational employees.

11 An accident without serious injury has occurred. What should be done in this case?

- A This must be reported to the government's Health and Safety Inspection Service within 24 hours.
- B Steps must be taken to prevent the accident's recurrence.
- C The accident must be reported to the Emergency Services by dialling 112.

12 What is an example of a person-related factor that could lead to an accident?

- A Insufficient knowledge.
- B Inadequate supervision.
- C Insufficient time.

13

What technical measure prevents accidents involving grinders within a company?

- A Appointing an experienced technical manager.
- B Selecting a sound ergonomic design.
- C Establishing clear work instructions.

14

What are parts of an accident investigation?

- A A possible warning or fine issued by the government's Health and Safety Inspection Service.
- B Fast accident reporting and appropriate emergency assistance.
- C The gathering and analysis of evidence and a final report.

15

What constitutes a good plan of approach?

- A A verbal explanation of the Risk Assessment and Evaluation (RA&E) and the identified measures.
- B A written report on the measures as a result of the Risk Assessment and Evaluation (RA&E).
- C A presentation about the Risk Assessment and Evaluation (RA&E) and the identified measures.

16

Why is order and tidiness important to working safely?

- A The number of accidents goes down when there is order and tidiness.
- B Working in a dusty environment is unhealthy.
- C Because this is important for the company's image.

17

What is a frequent cause of stumbling, slipping or tripping?

- A The presence of cables and pipes lying across a walkway.
- B Failure to wear safety footwear.
- C The lack of barrier tape along a walkway.

18

What increases the probability of unsafe behaviour on the part of an employee?

- A Arrangements concerning the execution of the work have been made.
- B There is discord between the employer and the works council.
- C The work order is incomplete.

19 What is one task of the intermediary in posting a temporary agency worker to carry out a high-risk task?

- A Make arrangements with the hiring company concerning the specific instructions to be provided to the temporary agency worker.
- B Regularly visit the workplace to check whether the temporary agency worker is following the instructions.
- C Provide the temporary agency worker with the training required to use the machines at the workplace.

20 What is part of the intermediary's task to encourage safe working?

- A To oblige the hiring company to discuss all safety facilities with the intermediary in advance.
- B To evaluate the execution of the job.
- C To introduce safer working methods into the labour process.

21 What action is an employee required to take if a protective device adversely impacts the pace of work?

- A Ask technical services to remove the protective device.
- B Leave the protective device in place and use it in the correct way
- C Temporarily deactivate the protective device him/herself.

22 Which work accidents must be reported to the government's Health and Safety Inspection Service?

- A All serious accidents.
- B All accidents.
- C Only fatal accidents.

23 What is a safety passport?

- A A personal document stating important details regarding education, training courses, medical fitness and vaccinations.
- B A personal document that keeps track of the companies where the employee has worked.
- C A personal document that the employee is required to show when travelling abroad and that identifies the companies for which he/she has worked.

24 What is the task of the temporary employment agency with respect to health and safety at work?

- A Provide the temporary agency worker with general information about content, risks and prevention measures.
- B Provide the necessary personal protective equipment (PPE - Dutch abbreviation: PBM's).
- C Organise the safety training.

25 What must the hiring company define when requesting a temporary agency worker?

- A What personal protective equipment (PPE - Dutch abbreviation: PBM's) must be worn.
- B Quality requirements that the personal protective equipment (PPE - Dutch abbreviation: PBM's) must meet.
- C The conditions for working overtime in safe circumstances.

26 What is the purpose of general safety rules?

- A They govern reporting in and out at the work site.
- B They govern the use of safety harnesses for working at height.
- C They identify the correct barriers to be installed for work activities.

27 In which situation should you use a blanking flange?

- A When checking the contents of a tank via a sampling point.
- B To prevent internal contamination when transporting new pipes.
- C To shut off the supply line when working in a confined space.

28 Why would it be necessary to obtain a supplementary werkvergunning (work permit)?

- A For working with tools and machines.
- B For working with cranes and cherry pickers near important installations.
- C For working with extension ladders.

29 What does a prohibitory sign on the construction site look like?

- A Circular white sign with a blue symbol.
- B Circular white sign with a red border and a red diagonal line.
- C Diamond-shaped orange sign that contains a white symbol.

30

What rules apply to the employer in terms of paying attention to the hazards at the work site?

- A It is only mandatory if so indicated by the arbodienst (Occupational Health and Safety Service).
- B It is a mandatory component of the briefing programme.
- C It is a voluntary component of the briefing programme.

31

The supervisor has an important task concerning werkvergunningen (work permits). What is the minimum he/she must do?

- A Ensure that the werkvergunning (work permit) is handed in immediately when the work ends.
- B Ensure that the werkvergunning (work permit) is available at the place of work.
- C Ensure that he/she can use the werkvergunning (work permit) again the next time.

32

What are the phases in controlling and tackling emergency situations?

- A The initial alarm, the actions and measures, and finally the termination.
- B The initial alarm, the implementation of measures, and termination by a sound signal.
- C The initial alarm, the installation of crowd control barriers and alerting the emergency services.

33

What is a task of the bedrijfshulpverlening (company emergency response team)?

- A To provide first aid to victims.
- B To prepare the (internal) company emergency plan.
- C To train employees in intervention.

34

What type of breathing protection do you use in a space with little oxygen?

- A A filter mask with the correct filter cartridge.
- B A disposable mask, provided it is a good fit for your face.
- C Self-contained breathing apparatus.

35 A hazardous situation arises. When should people and the source be separated from each other?

- A When it is impossible to tackle the source.
- B Once you have successfully dealt with the source.
- C When personal protective equipment (PPE - Dutch abbreviation: PBM's) is not available.

36 The following pictogram is displayed on the packaging of a substance. What is a characteristic of this substance?

(black symbol on white background with red border)

- A Corrosive.
- B Highly flammable.
- C Oxidising.

37 What could be a cause of hazardous substances leaking out of a storage tank?

- A Poor mounting of flanges.
- B The liquid level being too low.
- C Inadequate ventilation.

38 What can affect the consequences of poisoning?

- A The victim's experience.
- B The victim's age.
- C The victim's training and education.

39 What does the blue area of the hazard diamond identify?

- A The health risks.
- B The stability of the substance.
- C The risk of fire.

40 Where could asbestos be present?

- A In the heat insulation of installations.
- B In old furniture.
- C In packaging materials.

41 What is the name of the concept in which substances start burning without the aid of an ignition source?

- A Ignition temperature.
- B Flashpoint.
- C Auto-ignition temperature.

42 What is the first thing you should do when you discover a fire?

- A Alert the fire department.
- B Alert the police.
- C Ensure your own safety.

43 What is an explosion-hazardous environment?

- A An environment in which an explosive mixture can arise.
- B An environment where many explosions happen.
- C An environment with too much gas and too little air.

44 How does a catalyst affect a fire?

- A It affects the speed of the combustion process.
- B It affects the flashpoint of a liquid.
- C It affects the smoke production of a fire.

45 Why is sand a good extinguishing agent for flammable liquids spread across the ground?

- A Sand inhibits the supply of oxygen.
- B Sand cools the liquids.
- C Sand retards combustion.

46 What is an important issue when assigning a job to a temporary agency worker?

- A Approval from the hiring company if the selection deviates from the conditions in the request.
- B Information from the hiring company if the selection deviates from the conditions in the request.
- C Approval from the temporary agency worker if the selection deviates from the conditions in the request.

47 You are working with a large compressed air-driven jackhammer. With what requirement must this pneumatic hand tool comply?

- A This pneumatic hammer may only be used by workers who are legally certified to do so.
- B This pneumatic hammer must be suitable for different types of work.
- C This pneumatic hammer must feature a dead man's switch.

48 A safe hand grinder must be equipped with which of the following?

- A A side handle.
- B Zero voltage protection.
- C A lockable switch.

49 Which of the following is a hazard in working with hoisting equipment?

- A The employee may become physically overburdened.
- B The employee may incur hearing loss.
- C The load falling off the hook.

50

Which of the devices listed below is an unpowered hoisting device?

- A A hoisting container.
- B A crab.
- C A manual hoist.

51

Are you permitted to use a forklift truck as a hoisting device?

- A Only if the forklift truck is equipped with special hoisting equipment.
- B This is only permitted when lifting slings around the tines are used for hoisting.
- C This is never permitted with any forklift truck.

52

Which toolbox meetings should a temporary agency worker attend?

- A The toolbox meetings organised by the hiring company and where the temporary agency worker is involved as an operational employee.
- B The toolbox meetings that are organised by the temporary employment agency.
- C He/she is not obliged to attend toolbox meetings.

53

Why is the use of propane in pits and cellars dangerous?

- A The use of propane is associated with very high temperatures and fire can erupt in pits and cellars.
- B The use of propane consumes very high amounts of oxygen.
- C Propane is heavier than air, as a result of which it collects at the lowest point.

54

How can you prevent falling hazards at the edge of a work floor?

- A By putting proper barriers at the edge of the work floor.
- B By giving the workers proper instruction at the start of the work.
- C By placing warning signs at the edge of the work floor.

55 You come across a spread out tarpaulin on a work floor. What is the one thing you must be sure to take into consideration?

- A That the wind has caused the tarpaulin to become loose.
- B You may only put rubbish on this tarpaulin.
- C That there might be an opening below the tarpaulin.

56 Working with gas cylinders/bottles in an excavation can create added danger. What safety measure do you need to take?

- A Do not place any gas cylinders/bottles in the excavation.
- B Only position the gas cylinders/bottles against the wall of the excavation.
- C Never work with gas in or near an excavation.

57 What safety rules apply to working in a safety cage attached to a crane?

- A Wearing personal fall protection (safety harness) is mandatory.
- B The crane driver and the people in the safety cage must be able to see each other at all times.
- C Entering or exiting the safety cage is permitted when it is less than one metre off the ground.

58 What increases the risk of fire or explosion in a confined space?

- A There is little ventilation, as a result of which the air pressure can increase quickly.
- B There is little ventilation, as a result of which the LEL (Lower Explosion Limit) can be reached quickly.
- C There is little ventilation, as a result of which the grenswaarde (Dutch for: threshold limit value) (MAC value) can be reached quickly.

59 What aspect must definitely be considered in conducting an evaluation of the temporary agency worker with the hiring company?

- A The following of safety instructions by the temporary agency worker.
- B The wear and tear on the personal protective equipment (PPE - Dutch abbreviation: PBM's) when carrying out the work.
- C Respecting breaks.

60 How can you reduce the risk of electrocution?

- A By standing on a rubber mat.
- B By working with wet hands.
- C You cannot reduce the risk of electrocution.

61 What increases the risk of accidents involving electricity at your workplace?

- A The use of uninsulated tools.
- B The use of rechargeable tools.
- C The use of spark-free tools.

62 What is a hazard in the use of extension cables and multiple sockets?

- A Overloading of the cable, which can lead to fire.
- B Short-circuit when too many power cables and electrical plugs are used.
- C Leakage currents with the attendant danger of electrocution.

63 When are you allowed to work independently on an electrical installation?

- A When you have a diploma for this.
- B When you have the VCA (SCC) Basic Safety diploma.
- C After you have received verbal instructions.

64 What are the hazards of exposure to noise?

- A Reduced concentration.
- B Heart rhythm disorders.
- C Muscle ache.

65 Two noise sources of 80 dB(A) each are placed together. How high is the total sound (pressure) level?

- A 83 dB(A).
- B 120 dB(A).
- C 160 dB(A).

66

Who is responsible for making suitable equipment available for use during lifting?

- A The Occupational Health and Safety doctor.
- B The safety expert.
- C The employer.

67

What is the requirement that personal protective equipment (PPE - Dutch abbreviation: PBM's) is expected to meet?

- A It must be approved by the arbodienst (Occupational Health and Safety Service).
- B It must have a CE mark.
- C It must have a KEMA quality mark.

68

What is the maximum attenuation value of hearing protection plugs?

- A 10 dB(A).
- B 30 dB(A).
- C 45 dB(A).

69

How are the different protection classes of dust filters designated?

- A Blue, brown and black.
- B P1, P2 and P3.
- C S1, S2 and S3.

70

What requirement is a safety harness expected to meet?

- A A safety harness must have double stitched shoulder straps.
- B A safety harness must fit well and be adjusted to the wearer.
- C A safety harness must be equipped with leather seat straps.
